DoD Funding Policy:
Construction of Community Facilities

This policy prescribes a single source of funding for construction of community facilities in accordance with guidance provided in the Conference Report on the DoD Military Construction Authorization Bill for Fiscal Year 1980 (Pub. L. 96-125). Distinction is made for construction of facilities at new installations or where expansion is required because of a mission change or influx of new units or systems and in certain instances for support of U.S. Forces deployed in foreign areas, where DoD personnel do not have ready access to civilian community or commercial alternatives normally available in the United States. The footnotes to the funding chart reflect these distinctions. Additionally, it is recognized that from time to time Service-unique situations or exigencies that need immediate or more specific attention may require deviation or exception to the basic funding policy. These deviations or exceptions will be reviewed by the ASD(MI&L) and ASD(C) on a case-by-case basis.

¹Appropriated funds may be used for all community facility construction related to the establishment, activation, or expansion of a military installation or relocation of facilities for convenience of the government; replacement of facilities denied by country-to-country agreements; restoration of facilities destroyed by acts of God, fire, or terrorism; and to correct life safety deficiencies. In the case of installation "expansion," a major increase in authorized and assigned personnel strength over a short period of time is necessary before appropriated fund construction can be programed. Such expansion must be the result of a mission change or influx of new units or systems. For example, a 25 percent increase in a 1-year timespan satisfies these criteria. In contrast, personnel increases resulting from an evolutionary expansion occurring over several years does not satisfy these criteria.

²Consolidated open mess facilities (including modular construction) outside the United States.

³Exchange facilities required in areas of military conflict; or as integral parts of air terminal, hospital, housing or other construction projects.

⁴Exchange administrative/storage/maintenance facilities outside the United States and all laundries, dry cleaning plants, bakeries, dairies, or similar facilities operated by an exchange in support of a military mission.

⁵Arts and craft/automobile self-help garage/skill development centers outside the United States.

⁶Banks at locations where on-base banking services are required, but where the patronage base is insufficient to provide these services on a self-sustaining basis. (See DoD Instruction 1000.12 (reference (t))).

⁷Private funds.

⁸Surcharge trust funds.

⁹Authorized overseas where avoiding the expenditure of other appropriated funds (such as temporary lodging allowance, basic allowance for quarters, station housing allowance, and furniture support) would save appropriated funds.

¹⁰Playing courts and fields constructed as a part of a gymnasium, fieldhouse, or physical activities complex.
